### Hinweise zum RMK Stochastik per zoom:

Zoom access to the talks:

-----

<https://tu-darmstadt.zoom.us/j/82778699254?pwd=Z25mckV6dEx2Z3ZvK2NJOXNRWBCQT09>

Meeting-ID: 827 7869 9254

Code: 559655

Access to the virtual coffee breaks:

-----

We have two virtual rooms (each can host up to 25 people):

<https://gather.town/app/GF93050mhzZDdvhh/Stockholm%20room>

<https://gather.town/app/akclMPUirFqoqLIO/Bengaluru%20room>

Just open one of the websites with your browser (no mobile support!). You need to type in your name (just that other people can identify you). The required password in both rooms is

tud

Then you appear as a small figure in a landscape. You can move around in that landscape with your curser keys. The other people who are logged in are also represented by small figures in the landscape. By moving around yourself, you can get close to other people. When you are close to someone, the small video of that person will pop up and you can see and talk to that person. Once you move away, the video will close. In this way, you can walk around talking to different people, as you would do in a coffee break.

Let me stress that we did not put any coffee and neither did we hide any cookies anywhere in the landscape though.

Maybe you can log in and try the tool before the colloquium, as this makes it quicker for you to join during the coffee break. This tool is marked "beta", so please don't expect the (video) quality of zoom or alike.

Note that you have to switch off your camera/audio in zoom when working with the coffee break tool (e.g. you can log off from zoom during the coffee break).

The tool is available 24/7, feel free to use it also before and after the talks.
